Dear Ms. Kim:

RE: Canada Life Staff Pension Plan – Registration # 0354563 (“Plan”)

I am following up on my letter to you of December 13, 2005 and our telephone conversation of that same date.

Mercer has advised us that there are two primary issues that are contributing to the delay in completing the July 10, 2003 to June 30, 2005 partial wind-up report.

First, there are data collection and verification issues, primarily relating to Plan members outside of the partial wind-up group, which are taking Mercer longer than expected to address. This data is needed to complete the partial wind-up report and to split the Plan liabilities.

Second, the partial wind-up in this case is complicated by the fact that it covers a two-year period. The terminations of employment relating to the partial wind-up were staggered over these two years. In fact, as I noted in my letter to FSCO dated August 3, 2005, the partial wind-up would include a number of identified plan members whose employment was to be terminated post - June 30, 2005, but relating back to the integration. Not all of these terminations have occurred and accordingly, it needs to be resolved whether these individuals will in fact be part of the partial wind-up or not.

Page 2: December 15, 2005

Ms. Hae-Jin Kim

Financial Services Commission of Ontario

I can assure you that Canada Life is working diligently with Mercer in an effort to have the partial wind-up report completed as quickly as possible. Mercer has advised that the March 31, 2006 is a realistic deadline within which to complete the partial wind-up report.

Please do not hesitate to contact me if you have further questions or require additional information.

Yours truly,

W.B. Robinson
